POLYESTER INDUSTRIAL YARNS

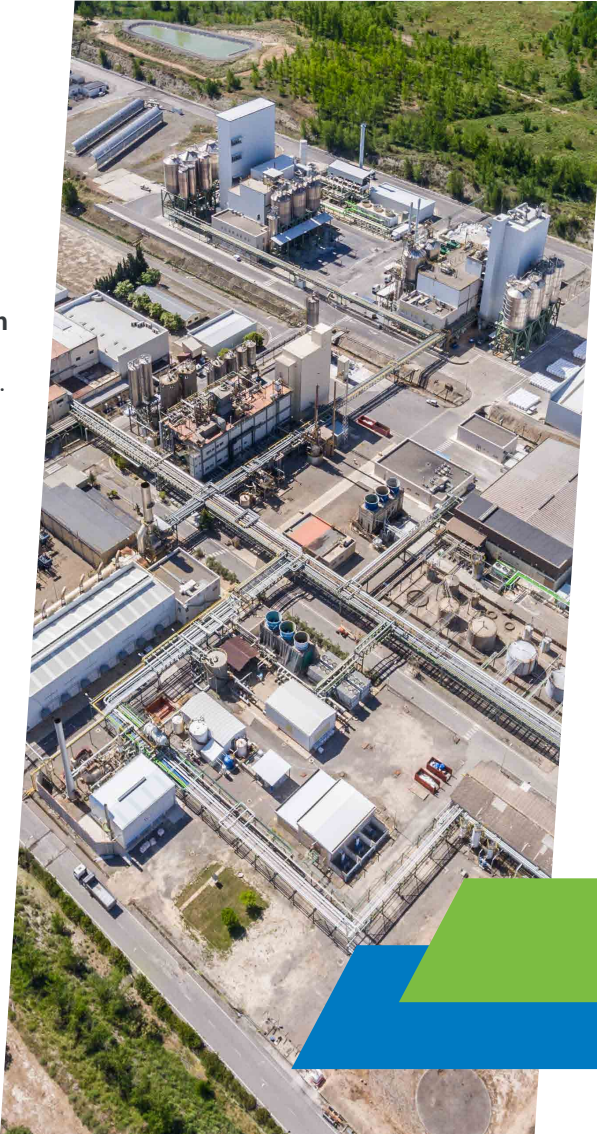

BRILEN stands out as the **most reliable long-term partner to supply PES industrial yarn** to the European market for the main technical end uses.

We offer to the market 26,000 tons of PES industrial yarns, from 140 dtex up to 9,900 dtex, intermingled and twisted, bright, semi-dull and spun died, on special tubes and cones, etc.

A **wide range of yarn types**, accomplishing the main industrial end uses requirements, is available in our portfolio: high tenacity, low shrinkage, high modulus, long durability, etc.

Customized properties could also be developed under common agreements.

Our main concern at BRILEN is to continuously improve, innovate and transform ourselves to make better products.
